OUR MISSION: To be a true Medical Home for our patients, providing excellent personalized medical care.

You may have heard lately about a concept called Patient-Centered Medical Home and wondered what this means. **The Patient-Centered Medical Home (PCMH) is not a place but an approach to providing continuous, comprehensive, coordinated care.** It consists of a partnership between patients and their personal healthcare team, as part of an integrated medical neighborhood. The Medical Home emphasizes whole person orientation with coordinated and/or integrated care across all elements of the complex health care system. It also involves enhanced access to make it easier for patients to contact their personal healthcare team. The Medical Home encompasses improved quality and safety by promoting prevention, proactively managing chronic illness, engaging patients in their care to attain optimum health, and using electronic systems to support this work.

and 1:30 p.m.- 4:00 p.m.

We are on call 24 hours a day/
7 days a week/ 365 days a year.

Your Patient Centered Medical Home

The Patient-Centered Medical Home (PCMH) is based on years of research that supports the need to improve how primary care is delivered. By following a patient-centered approach, every part of the health care system stands to benefit: patients, providers, employers and payers.

WHAT CAN MY PCMH DO FOR ME?

Your healthcare team will partner with you to live healthier continuously rather than only reacting to illness and/or injury. A medical home increases your access to care and coordinates your care within our office, hospitals and your specialists.

Mark W. Hinman, MD, LLC

OUR ROLE AS YOUR HEALTHCARE TEAM:

- **A safe environment** to talk about your confidential concerns.
- **Responses to ALL your questions** and concerns at each appointment.
- **Work with you in PARTNERSHIP**, using shared decision making to help you manage your health.
- **Serve as a quarterback** of your healthcare team, coordinating care both inside and outside the practice.

YOUR ROLE AS A PATIENT:

- **Be an active participant** on your healthcare team.
- **Bring a list of concerns/questions** and medications.
- **Call us** before you go to the ER or hospital – we can probably get you into the office the same day and/or after hours.
- **Inform other** healthcare professionals that we are your primary care provider and ask them to share information regarding your health with us.

WHAT TO BRING TO YOUR VISIT:

- Written list of questions and/or concerns.
- Written list of current medications.
- Test results.
